

HA International Celebrates 20 Years

2001

The HA International Journey

When Borden Chemical and Delta-HA merged in the beginning of April 2001, we believed that the synergies of two great companies could lead the way to support the Foundry Industry with the highest quality and most robust products available. We also wanted to become the supplier that helped foundries become more efficient and productive. Twenty years later, we lead the way and partner with some of the greatest companies in the world.

We have witnessed a lot of change the past twenty years – a global economic crisis, castings being outsourced to China and the Covid pandemic. We have seen these as opportunities to make HAI a better company. We have worked to build the capabilities of our most treasured resource, our employees and our most treasured lifeline, our customers. But above all else, our success is really about relationships with our Customers, Suppliers, and our owners. We are proud to be part of the HA Group which serves the industry across the globe.

2021

Thank You to Our Customers

To our customers who have trusted us throughout the years, it has been an honor and privilege to work with you to help achieve (and even exceed) your objectives. We could not have survived or attained our mission without you. Thank you for inspiring us every day. We look forward to spending the next twenty years (and beyond) providing you with innovative approaches to your casting challenges.

Thank You to Our Vendors

We have had the opportunity to work with hundreds of vendors throughout our history and have valued every partner. Many of our vendors serve as an extension of our team and have played an essential role in helping us reach our goals. To all our vendors, we value you tremendously and we thank you for your continued commitment to quality, responsive service and genuine collaboration.

The Future

One thing that has not changed is our company values. We start by being a good neighbor in the communities that we work. Our operations continually improve the safety of our employees and our processes. Our mission has been, and always will be, one of teamwork, with each other and with our customers and suppliers. With that vision, I am very optimistic that the future will be bright and will be filled with expansions, improvements, and more great people.

With sincere gratitude and appreciation,
